Chip PC Technologies - Making IT a Complete Solution

Truly dedicated to the Thin Client Industry, Chip PC is an innovative developer and manufacturer dedicated to offering enterprises world-class SBC and Thin client based end-to-end solutions, comprised of:

- **Control** - advanced *Xcalibur Global management software*.
- **Performance** - micro form-factor, powerful thin clients.
- **Security** - highly-secured solutions, including robust modular image, Smart Card PKI user authentication and more.

Among Chip PC customers are top organizations worldwide from various verticals, such as Healthcare (JLL-Sweden), Finance (Friesland Bank-Netherlands), Defense (Israeli Navy), Government (US Police), and Education (HES Business School-Netherlands).

Chip PC offers top products to the industry with its winning solution arriving first place in a recent, independent Thin Clients-Evaluation among 26 thin clients from 9 vendors.

Results in Brief:

Manufacturer	Model	Total points (0-10 points)
HP	T5500	4,90
NetWork	Sienna CE	4,81
NeoWare	Capio 610	4,29
Chip PC	EX 5450	9,78
Chip PC	EX 5000	9,26
Wyse	3125 SE	5,01
Igel	232 CE 4	5,46
VXL-Itona	CE	4,64

Who Buys Thin Clients? - Popular Verticals

- HealthCare
- Transportation
- Banking, Finance & Insurance
- Retail
- Manufacturing
- Hospitality
- Local Government

Business Uses For Thin Clients

1. For use by customers looking for cost savings through - Reduced Management overhead, lower maintenance & runnings costs, quick installation
2. Replacements for old Green Screen terminals - Thin Clients can emulate all the old terminals better than any PC!
3. For use in remote office locations over a wide area network- Thin Clients make life easier, quicker and more productive when working remotely
4. For use in a standardized desktop environment for tasked based workers - Gives users the tools to complete their job more efficiently
5. For use in Harsh work environments (manufacturing, dangerous & public places) - Thin Clients can live where PC's fail!

Small Products Big Solutions

10 Good Reasons Why Chip PC?

- 1 **The Only Full Thin-Client Enterprise Solution:** complete, PC-like centralized management through Chip PC Xcalibur Global Management system
- 2 **LAN-integrated, Power-over-Ethernet thin client solutions:** the patented Jack PC – EFI series
- 3 **Highest Performance:** thin clients in the market
- 4 **Richest Specifications Offerings:** the industry’s widest range of features in thin clients, such as Integrated PC/SC Smart Card Solutions
- 5 **Latest versions:** of ICA, RDP, IE and Local MP, including enhanced functionality
- 6 **Customizable Platform/Modular Image:** with the widest selection of software add on plug-ins
- 7 **Security:** full immunity from viruses and Trojans, advanced authentication modes and security levels incorporated into Xcalibur Global management software
- 8 **Reliability:** More than 10 years of product life (MTBF)
- 9 **Environmental Friendly:** Chip PC thin clients are the World’s Lowest-Power Desktop Devices consuming 3.5W at Full Working Mode
- 10 **Smallest-Size and Lightest Weight:** easy to ship, store & install, device weight 180 gr only

Thin Client

Model	Offer To Customers Who Need
EX-5070	Entry level still feature-rich thin client, multi-session support, fit to install ICA, RDP & Terminal Emulation and various plug-ins
EX-5450	High-end, high performance with multi-session support and strong 3D graphics
EX-5072/5452	Models with Integrated PC/SC Smart Card Reader/Writer Offering PKI Authentication
EFI 6700	The entry level of the Jack PC series, LAN-integrated model, Power-over-Ethernet, can also be powered by external power, Analog video, 4 USB
EFI 6800	The high-end of the Jack PC series, LAN-integrated model, Power-over-Ethernet, can also be powered by external power, Analog video, 4 USB
EFI 6900	The high-end of the Jack PC series, LAN-integrated model, Power-over-Ethernet, can also be powered by external power, DVI video supporting DVI/ Analog monitors, Dual Screen Support, 4 USB

Management Software

Xcalibur Global:

Chip PC Thin Clients arrive bundled with Xcalibur Global Licenses enabling full remote management of devices.

Xcalibur Global is the Industry leading management software, policy-based and designed for full control & simultaneous support of thousands of clients & users. Offering an MMC -Based Interface, it provides fault tolerance, speed, scalability and ease of management.

- Standard MMC snap-in administration tool
- Combines logical (Active Directory based) and physical (Xcalibur Farm based) management models
- Uses existing Active Directory Tree structure to perform management tasks.
- Assigns management policies to devices in any Active Directory level
- Scalable by adding Xcalibur Front End-Servers to the Xcalibur Farm as needed
- Fault tolerant through Redundancy & Load Balancing
- Centralized remote deployment of software to devices
- Centralized configuration, upgrade and troubleshooting of devices
- Uses existing Active Directory permission delegation and inheritance model to assign management permissions
- Uses an Independent Management Protocol that has built-in support for: SSL Encryption, Compression, Port Number Control, Bandwidth Control and more
- Optimized for enterprise network-infrastructure by using Xcalibur Sites and Proxies for bandwidth optimization
