Overview

Get more value out of your Citrix Virtual Apps and Desktops investment through the use of Workspace Environment Management, Application Layering, and advanced features. You'll leave this course with a good understanding of how to manage more complex solutions such as multi-zone environments spanning multiple locations with configurations around StoreFront, the Delivery Controllers, and HDX. You'll gain the skills to improve logon times, user personalization, and resource performance through Workspace Environment Management. Also, learn to optimize management of your app and desktop images by building and deploying App Layers with Citrix Virtual Apps and Desktops.

What you'll learn

- How to configure Workspace Environment Management to improve the end user environment and virtual resource consumption.
- Understand Zones in XenApp and XenDesktop and how to account for user and desktop locations and optimal connection and registration.
- How to build and manage App Layers to minimize image sprawl with Citrix Virtual Apps and Desktops.
- Understand and configure HDX channels and protocols for improved performance delivering multimedia and data over network connections.
- Understand user connection flows and tools to better troubleshoot end user issues.

Is this course for you?

Built for experienced IT Professionals working with Citrix Virtual Apps and Desktops. Potential students include administrators, engineers, and architects responsible for the end user workspace, app and desktop images, and overall health and performance of the solution.

Prerequisite Knowledge

Strong foundational knowledge of Citrix Virtual Apps and Desktops 7.1x. Citrix recommends students prepare for this course by taking the following course: **CXD-210** Citrix Virtual Apps and Desktops 7.1x Administration.

Citrix Versions Covered

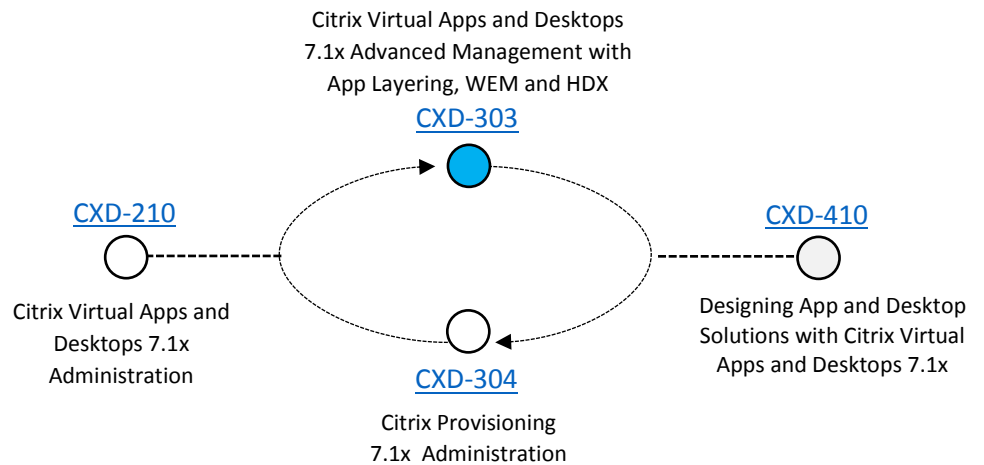

This course is currently on Citrix Virtual Apps and Desktops 7.15.

Descrizione del corso

Learning Path

Certification

CCP-V*

Course Length

3 days

Topic Outline

Module 1: Intermediate Site Architecture

- FMA Services
- SQL database connectivity and security
- Multi-zone VDA registration
- Zone preference

Module 2: Workspace Environment Management (WEM) (Extended Module)

- Introduction to WEM
- Administration
- Optimizing resource consumption on VDA hosts
- Managing the end-user experience with WEM
- Migrating existing settings and configurations to WEM

Module 3: StoreFront Optimization and Routing

- User experience optimizations
- StoreFront branding
- Optimal Gateway routing and Zones
- Subscription Store

Module 4: HDX and Multimedia

- HDX in the network
- Enlightened Data Protocol (EDT)
- Multimedia delivery and redirection
- Delivering Skype for Business with Citrix Virtual Apps and Desktops 7.1x

* This course partially prepares students for the exam along with the CXD-304. Alternatively students may attend the CXD-310 which corresponds with all materials on the exam
