Fast deployment and simplified management for Virtual Workspace

CITRIX Ready

From 25 to 800 seats

Two compute nodes inside

The smart server that enables the deployment of the workspace virtualization technology of Flexxible IT and Citrix

Fast and easy deployment in a matter of minutes!

A SDI (Shared Desktop), VDI or Apps solution ready in just two hours

An on-premise or cloud virtual workspace solution is complex for SMEs due to cost limitations and the need for specialized personnel to deploy, configure and manage the solution. Flexxible IT has developed a hyper-converged turnkey appliance (servers, networks and storage) ready in two hours and specially designed for the SME market, that can be managed without the need for IT personnel specialized in virtualization.

Easy L1 & L2 support without Citrix knowledge

A virtualized managed environment with no need of technical expertise

Flexxible|VDI OS Manager was developed in-house by Flexxible IT to manage desktops, servers, and resources autonomously with no need for technical expertise. Most operations are automated.

With Flexxible|VDI OS Manager you have control of all virtual infrastructure regardless of your location in an easy, fast and secure way.
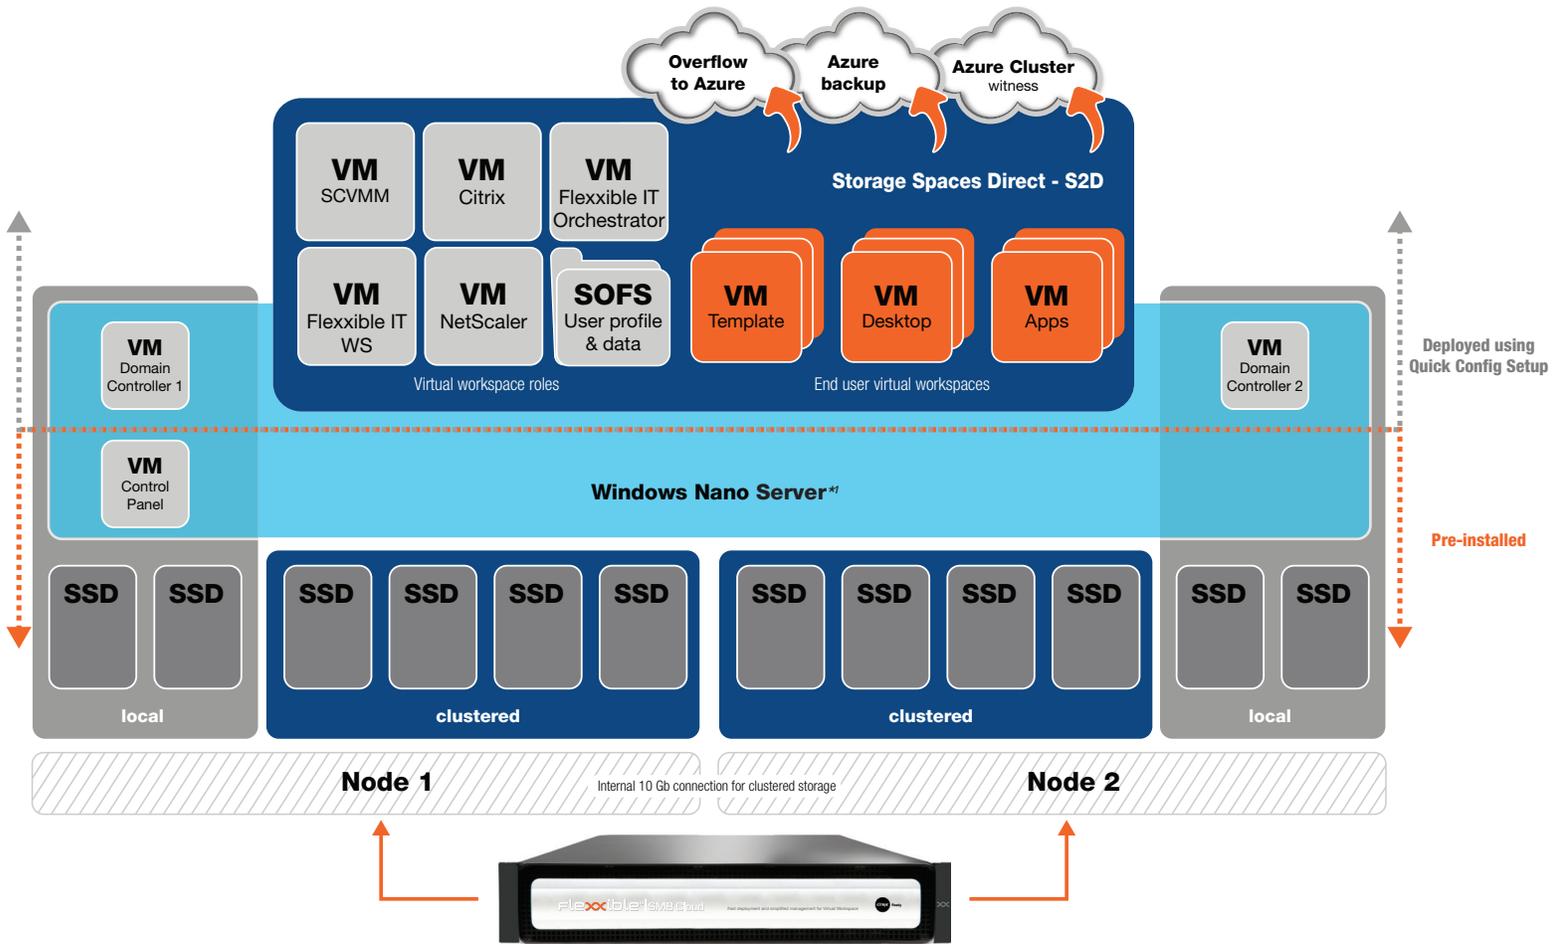

Reduces cost by half!

Flexxible|SMB Cloud, with everything prepared and ready for deployment

Provides SDI, VDI and Apps infrastructure, personal storage functions and pre-configured applications like Microsoft Office 365. All this infrastructure comes with up-to-date operating systems and improved security.

High availability included

Users can work from any location and from any device using an internet connection. The user experience does not change and they can access Apps and data as if they were in the office.

Discover a hassle-free virtual workspace with Flexxible IT

Flexxible®|VDI OS

Single point of web management and orchestration for your entire virtual workspace platform. Co-management of Hypervisor, VM manager, Citrix Studio and Citrix Director. Flexxible|VDI OS – use it on on-prem or hybrid platforms.

Flexxible®|SMB Cloud

SMB Cloud Appliance is a virtual workspace for professionals that offers cloud technology for small and medium-sized entities which can be easily installed in less than two hours. Users can work wherever they want, as if they were in the office. Managed using VDI OS.

Flexxible®|VDI System

VDI System Appliance devices are installed in the customer's datacenter. Recommended for an environment of 500 to 50,000 users (or more). Secure access to the environment without need for corporate VPN. Managed using VDI OS.

*1 XenServer support will be available soon

Increase your business with Flexxible|VDI OS on any Citrix platform
